

IB-GREEN Instructions

5 Easy steps and you're done!

Visit WWW.INKBLASTER.COM for Video Demo

- 1.) Remove all excess ink from roll with lint free rag or heavy duty paper towel
- 2.) Apply an estimated tablespoon of **IB-GREEN** to a "Ink Blaster" sponge applicator and coat the entire roll. (ie. Left to right motion) - If using a squirt nozzle, squirt product onto the sponge. ****Apply to roll with the sponge****
- 3.) Let it sit for 1:30 to 2 minutes
- 4.) Use water to "dampen" a heavy duty paper towel to remove the **IB-GREEN** (This will de-activate the product)
- 5.) Let roll dry or dry with towel

When IB-Green is used for each cleaning, you will experience less build up and more robust cells. You may need to repeat this process on rolls that have not been deep cleaned regularly. If you need to repeat the process make sure the roll is completely dry and free of water.

Notes:

*Do not dilute, water de-activates the product

*A little IB-Green goes a long way! Product is designed to be used sparingly
